**SAFETY INFORMATION**

Only black finish impact sockets specifically made for the purpose should be used with impact tools. Chrome plated or normal sockets are designed with a thinner socket wall for improved access to fixings and are not designed to cope with the stresses caused by the force of an impact wrench and may shatter, resulting in personal injury.

### SAFETY INFORMATION

Only black finish impact sockets specifically made for the purpose should be used with impact tools. Chrome plated or normal sockets are designed with a thinner socket wall for improved access to fixings and are not designed to cope with the stresses caused by the force of an impact wrench and may shatter, resulting in personal injury.
